

# Year 8 mathematics test

# Paper 2

## Calculator allowed

Please read this page, but do not open your booklet until your teacher tells you to start. Write your details in the spaces below.

First name	
Last name	
Class	
Date	

## Remember

- The test is 1 hour long.
- You **may** use a calculator for any question in this test.
- You will need: pen, pencil, rubber, ruler, an angle measurer or protractor, a pair of compasses and a scientific or graphic calculator.
- Some formulae you might need are on page 2.
- This test starts with easier questions.
- Try to answer all the questions.
- Write all your answers and working on the test paper do not use any rough paper. Marks may be awarded for working.
- Check your work carefully.
- Ask your teacher if you are not sure what to do.

Total marks

## Instructions

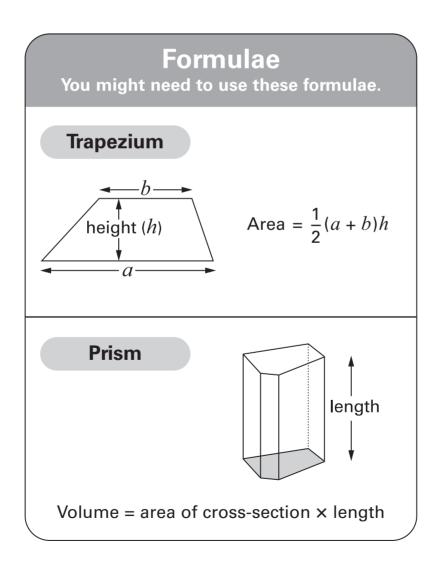

## Answers

This means write down your answer or show your working and write down your answer.

## Calculators

You **may** use a calculator to answer any question in this test.

Here is an algebra puzzle.

The shaded column shows the total of each row.

For example: a + a + a = 24

а	а	а	24
а	b	b	28
а	b	С	19

Work out the values of a, b and c

### Leap year

1 month has 29 days.

4 months have 30 days.

7 months have 31 days.

#### Not a leap year

1 month has 28 days.

4 months have 30 days.

7 months have 31 days.

(a) In a **leap year**, what is the **probability** that a month chosen at random has exactly **28 days**?

1 mark

(b) In a year that is **not a leap year**, what is the **probability** that a month chosen at random has exactly **28 days**?

. . . . 1 mark

(c) In any year, what is the **probability** that a month chosen at random has **31 days**?

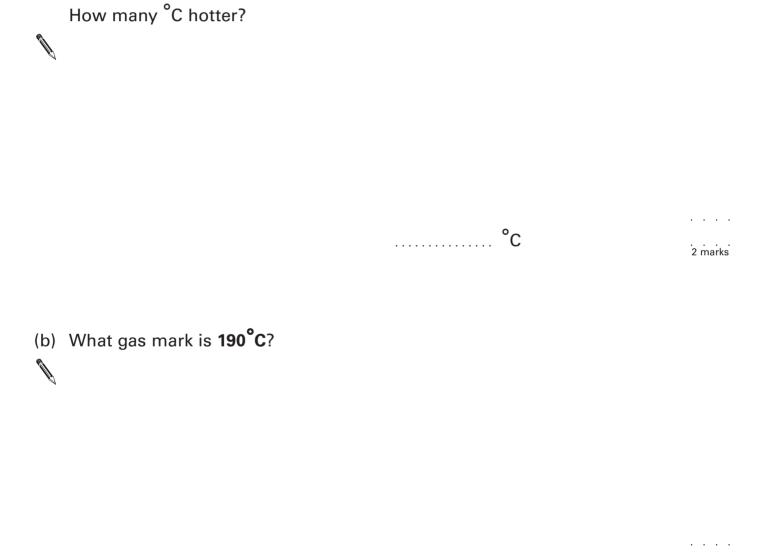

1 mark

Most new ovens have temperatures marked in °C Some old ovens have temperatures marked in units called gas marks.

Here is how to change gas marks to  $^{\circ}C$  :

(a) Gas mark 6 is hotter than gas mark 2

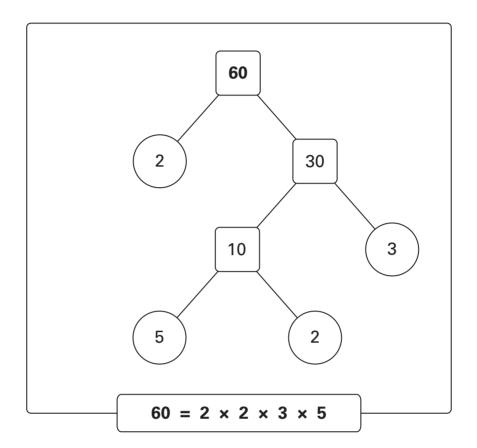

Gas mark .....

. . . . . 2 marks You can write any whole number as a product of its prime factors.

Here is an example for the number 60:

4

Write **225** as a product of its prime factors.

225 = ..... . . . . . 2 marks The perimeter of a **rectangle** is one metre.

Each **longer** side is 36 centimetres.

5

6

What is the length of each shorter side?

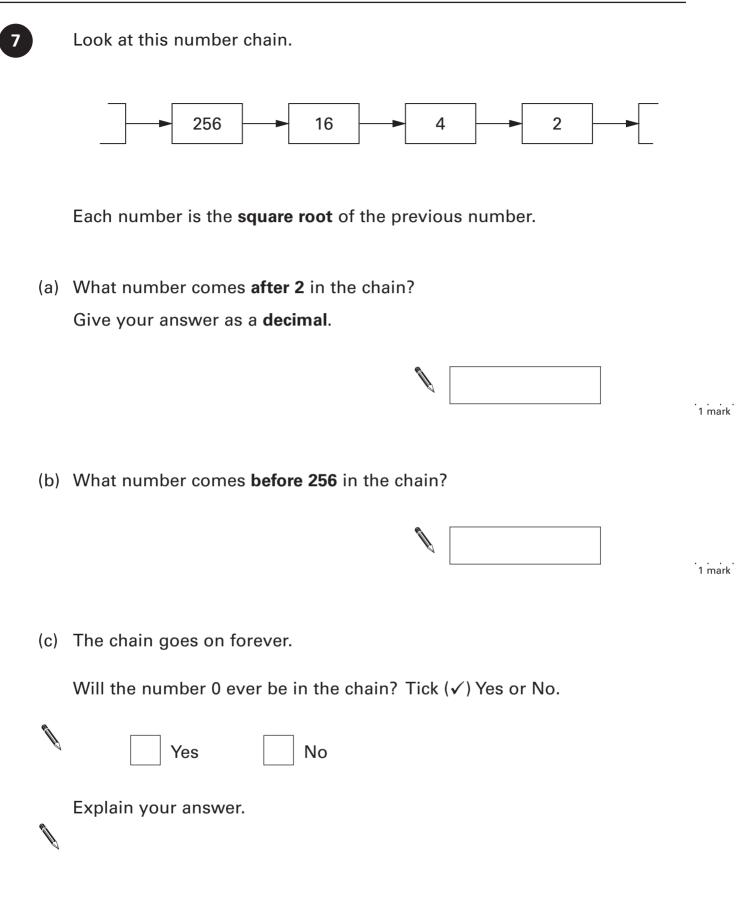

..... centimetres

. . . . 2 marks

How many two-digit numbers have digits that add to twelve?

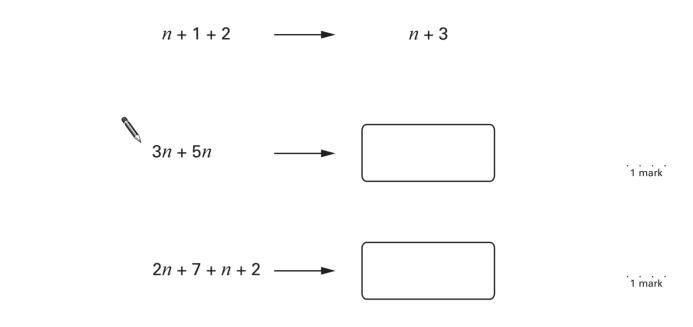

. . . . 2 marks

. . . . . . . . . . . . . . .

. . . . . 1 mark (a) Write these expressions as simply as possible.

The first one is done for you.

(b) Multiply (5n + 2) by 3

Ŋ

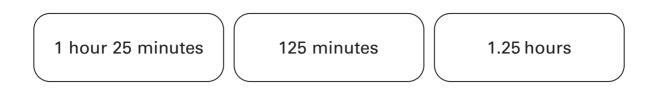

Write your answer without any brackets.

. . . . . 1 mark

(c) Multiply (n + 2) by (n + 3)

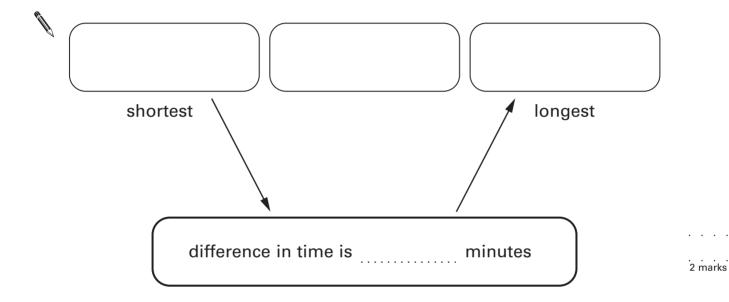

Write your answer without any brackets.

. . . . . 1 mark Look at these three time intervals.

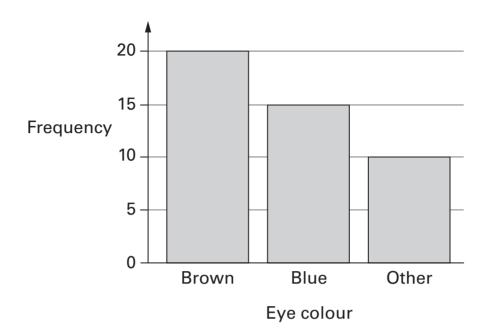

Arrange them in size order, shortest first.

Then fill in the missing number of minutes.

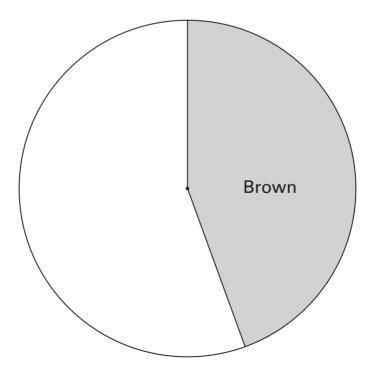

The bar chart shows the eye colour of **45** different people.

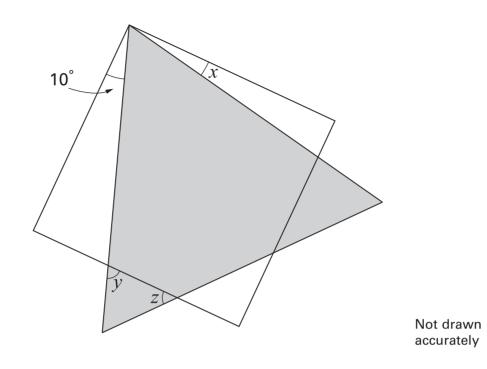

10

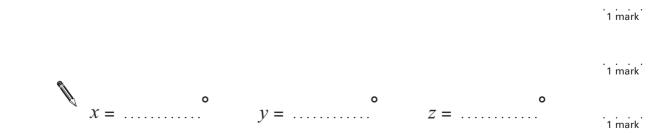

Complete the pie chart to show the same data.

. . . . 2 marks The diagram shows a square and an equilateral triangle.

Calculate the sizes of angles x, y and z

Work out the answer to:

 $\frac{(128 - 89.6) \times 1.25}{128 - (89.6 \times 1.25)}$ 

Tim Henman is a tennis player.

In 2002 a newspaper published this information about his earnings.

On court earnings	Off court earnings
£700000	£2.1 million

What percentage of Tim's total earnings was from off court earnings?

.....%

. . . . 2 marks

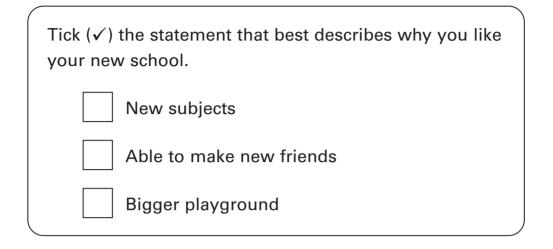

13

12

13

. . . . 1 mark

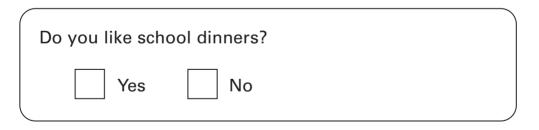

- Pupils in year 8 wanted to know if pupils in year 7 liked their new school. They wrote a questionnaire.
  - (a) Here is one question.

Give one reason why this is not a very good question.

. . . . . 1 mark

(b) Here is a different question.

Give one reason why this is not a very good question.

The picture shows a two shilling coin. People used these coins in England before the year 1971.

The radius of this coin is 1.4cm.

What is the area of the face of the coin?

. . . . 2 marks

Solve this equation.

15

5y + 3 = 3y + 14

 $y = \dots \dots \dots \dots$  2 marks

I did an experiment.

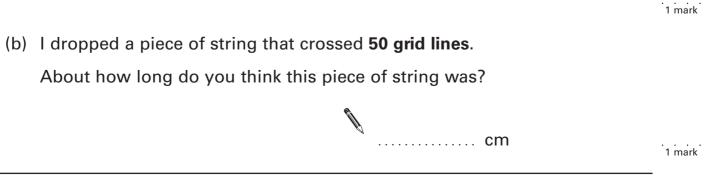

I dropped a piece of string onto a square grid.

I recorded the number of grid lines that it crossed.

I repeated the experiment with different lengths of string. The scatter graph shows my results.

(a) What is the relationship between the length of string and the number of grid lines crossed?

Different sequences of numbers start like this:

(a) The *n*th term of one of the sequences is n(n-1)+2

What is the 4th term of this sequence?

(b) The *n*th term of a different sequence is  $2^n$ What is the **4th term** of this sequence?

. . . 1 mark

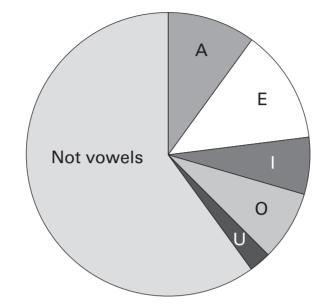

. . . . . 1 mark

. . . 1 mark

2 marks

Writers use some letters of the alphabet more than others.

The pie chart shows how often one writer used vowels (A, E, I, O or U) in a sample of his writing.

(a) Marie says:

19

'The pie chart shows the letter used most often is E'.

Do you agree with her? Tick ( $\checkmark$ ) Yes or No.

	Yes No
	Explain your answer.
Ø	
(b)	The letter E was used <b>130 times</b> .
	The angle of the sector representing E is <b>46.8°</b>

Altogether, how many letters were in the writer's sample?

. . . . . . . . . . . .

Look at this information.

There are about 60 million people living in the UK.

In every 1000 people there are about 200 who are aged under 16

Of the people aged under 16, about 20% had their sight tested last year.

About how many people aged under 16 had their sight tested last year?

20

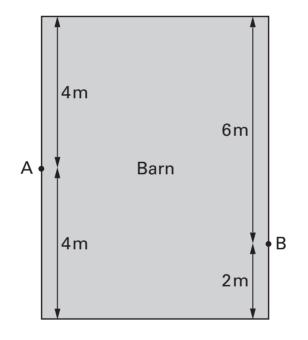

Two goats are tied to points A and B on opposite sides of a barn.

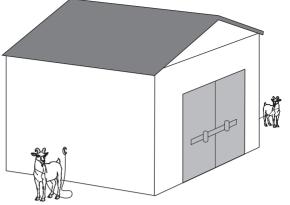

The scale drawing below shows the barn and where the goats are tied. Each goat can reach exactly 4 metres.

Draw accurately the area each goat can reach.

. . . . . 1 mark

. . . . . 2 marks

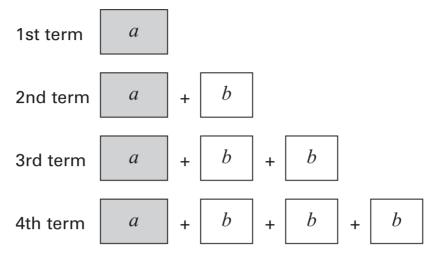

. . . . . 1 mark

2 marks

(a) The diagrams represent a number sequence.

The sequence continues by adding b each time.

A pupil says:

The *n*th term is a + nb

The pupil is **wrong**. What is the nth term of the sequence?

(b) A number sequence begins:

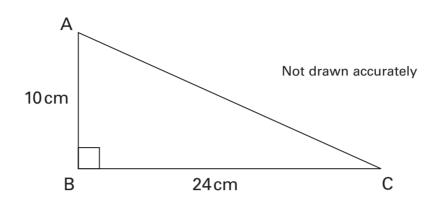

12, 18, 24, 30...

The sequence continues by adding 6 each time.

What is the 81st term of the sequence?

. . . . . . . . . . . . . . .

The diagram shows a right-angled triangle.

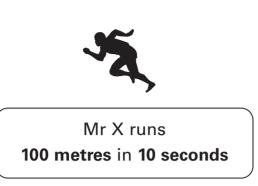

Use Pythagoras' theorem to work out the length of side AC.

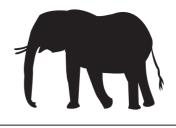

..... cm

2 marks

Ø

Elephant's average running speed is **40km/h** 

Which average speed is greater? You **must** show your working.

. . . .

. . . . . 2 marks A pupil collected data on the number of people in cars.

25

Ø

Number of people in each car	Frequency
1	178
2	32
3	26
4	4

Show that the **mean** number of people in a car was **1.4** 

. . . .

. . . . 2 marks **END OF TEST**
