## Autumn mark scheme

## Year 6 - Reasoning \& problem solving

## General marking principles

- Answers should be single values in their simplest form unless the mark scheme says otherwise
- Accept reversed digits provided intention is clear e.g. a reversed 2 must clearly show the characteristics of a 2 rather than a 5
- Do not award the mark if more than one answer is given
- For numbers with four or more digits, accept answers with a comma positioned incorrectly or without a comma. Do not accept a decimal point or an apostrophe.

| Question | Answer | Marks | Notes and guidance |
| :---: | :---: | :---: | :---: |
| 1 | $\begin{array}{\|c\|c\|c\|} \hline 1 & 5 & \boxed{6} \\ \hline \end{array}$ | 1 |  |
| 2 | 7,000,000 | 1 | Accept e.g. "7 million". |
| 3 | $\begin{aligned} & 500+1,500=2,000 \\ & 500 \times 4=2,000 \end{aligned}$ | 2 | Award 1 mark for each correct answer. <br> No marks if numbers are reversed. |
| 4 | $\begin{aligned} & 875,102 \\ & 7,012,850 \\ & 7,085,210 \\ & 7,201,850 \end{aligned}$ | 1 |  |
| 5 | -2 | 1 |  |
| 6 | 1,990,000 | 1 |  |
| 7 | 144 | 2 | Award 1 mark for attempt to multiply 12 by 4 and multiply the result by 3, or equivalent. <br> Accept 1 m 44 cm or other equivalent answers. |
| 8 | Indicates "Yes" and gives a correct reason e.g. " 1 is the only number that divides into both of them exactly" | 1 |  |

| Question | Answer | Marks | Notes and guidance |
| :---: | :---: | :---: | :---: |
| 9 | Indicates $\frac{3}{5}$ and $\frac{15}{25}$ | 1 |  |
| 10 | 680 ml | 2 | Accept any equivalent answer e.g. 0.68 litres or 68 cl etc. <br> Award 1 mark for complete correct method with no more than one arithmetic error e.g. attempt to multiply 220 by 6 and subtract the result from 2,000 |
| 11 | 32 | 2 | Award 1 mark for complete correct method to divide 768 by 24 with no more than one arithmetic error e.g. long division, short division, division by 12 and then division by 2 etc. |
| 12 | $6+2 \times 5=16$ | 1 |  |
| 13 | Indicates DX and gives a reason e.g. <br> - It's only 10 more and the other one is 50 less <br> - $\mathrm{DX}=510$ but CDL $=450$ | 1 |  |
| 14 | $2 \frac{4}{10}=\frac{12}{5}$ | 1 |  |
|  | $\frac{2}{3}$ of $60=\frac{4}{5}$ of 50 | 2 | Award 1 mark for $\frac{2}{3}$ of $60=$ 40 seen or implied |
| 15 | 17 | 2 | Award 1 mark for complete correct method e.g. attempt to divide 660 by 40 with no more than one arithmetic error. <br> Do not accept 16.5 or equivalent for both marks |

## Autumn mark scheme

## Year 6 - Reasoning \& problem solving

| Question | Answer | Marks | Notes and guidance |
| :---: | :--- | :---: | :--- |
| 16 | $\frac{2}{9}, \frac{2}{7}, \frac{3}{7}, \frac{3}{5}$ | 1 |  |
| 17 | $3 \frac{3}{20}$ | 2 | Accept equivalent fractions <br> or exact decimal i.e. 3.15 <br> Award 1 mark for correct <br> method to add $5 \frac{1}{2}$ and $2 \frac{2}{5}$ |
| and subtract 4 $\frac{3}{4}$ with no |  |  |  |
| more than one arithmetic |  |  |  |
| error. |  |  |  |\(\left|\begin{array}{l}Accept any exact <br>

equivalent e.g. 1,750 \mathrm{~m} . <br>
Award 1 mark for correct <br>
method with no more than <br>
one arithmetic error e.g. <br>
attempt to subtract 3 \times <br>
250 from 6,000 and divide <br>
the result by 3\end{array}\right|\)

Total : 30 marks
