# **Instructions**

You **may not** use a calculator to answer any questions in this paper.

### **Questions and answers**

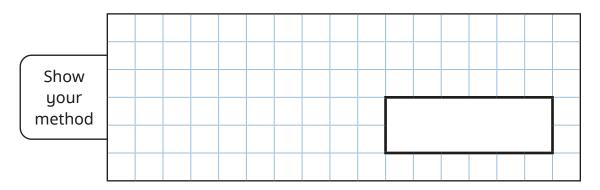

You have **50 minutes** to complete this paper.

Follow the instructions for each question.

Work as quickly and as carefully as you can.

If you need to do working out, you can use the space around the question.

# Some questions have a method box like this:

For these questions you may get a mark for showing your method.

If you cannot do one of the questions, go on to the next one.

You can come back to it later, if you have time.

If you finish before the end, **go back and check your work**.

#### Marks

The number under each line at the side of the page tells you the maximum number of marks for each question.

4	2
	4

Write the missing number to make the calculation correct.

1 mark

13

Here are two numbers written in Roman numerals.

CDL

DX

Tick the number that is closer to 500

Explain your reasoning.

1 mark

Find the missing numbers.

$$2\frac{4}{\boxed{\phantom{0}}} = \frac{12}{5}$$

1 mark

$$\frac{2}{3}$$
 of  $60 = \frac{4}{5}$  of

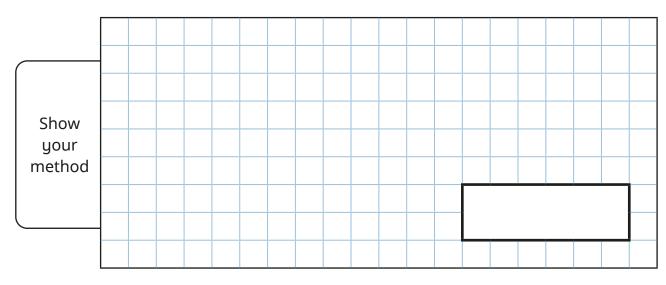

2 marks

15

660 children go on a school trip.

Each bus holds a maximum of 40 children.

How many buses are needed?

2 marks

Write the fractions in order of size, starting with the smallest.

$$\frac{3}{5}$$
  $\frac{2}{9}$   $\frac{3}{7}$   $\frac{2}{7}$ 

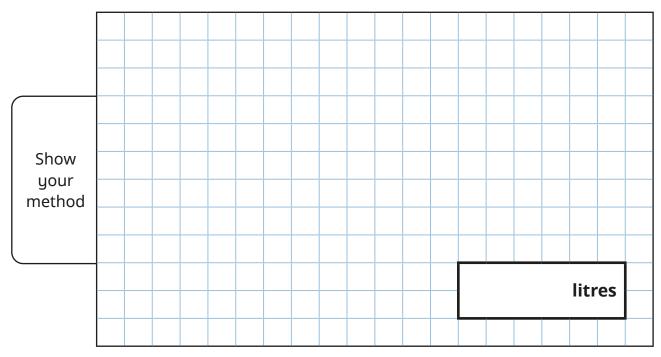

1 mark

**17** 

Tommy mixes  $5\frac{1}{2}$  litres of black paint and  $2\frac{2}{5}$  litres of white paint to make grey paint.

He uses  $4\frac{3}{4}$  litres of grey paint to paint his room.

How much grey paint does Tommy have left?

2 marks

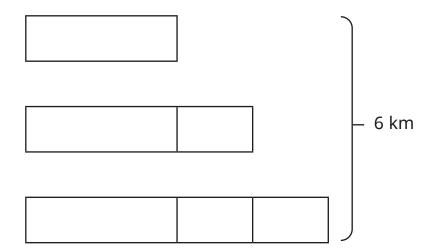

Rosie is training for a race.

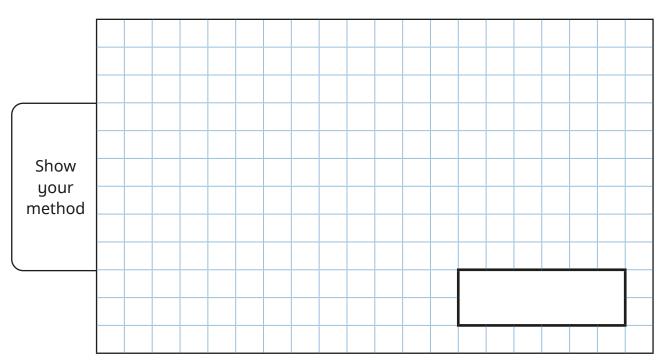

Each day, she runs 250 m further than the day before.

After three days' training, she has run a total of 6 km.

# How far did she run on the first day?

You may use the bar model to help you.

2 marks
